airtel

SYNC

AirtelSync

Small businesses go digital in one sitting: advice, quote, KYC and activation on a phone, in their language.

THE PROBLEM & WHO WE TARGET FIRST (Q1)

Only 7.4% of small-business leads become customers

7.4%
of leads activate

17.6 days
from lead to activation

₹15,053
spent per activation

3.0
calls chasing status, per customer

Where leads are lost

The steepest drop is needs assessed → quote accepted (44%). 1,624 of 4,632 lost leads (35%) dropped for reasons a digital journey removes: no visit possible (827), slow or confusing quotes (385), paperwork (273), install delays or no fibre (139).

SEGMENT	SHARE	ACTIVATION	COST / ACT.	CHURN
Professional offices 1 · Lead: self-serve + calls	25%	11.1%	₹10,695	14%
Small multi-site 2 · Digital quote, field rollout	15%	11.0%	₹15,614	11%
Small manufacturers 3 · Field sales: leased lines	6%	12.8%	₹15,324	8%
Micro retail & services Volume · self-serve only	54%	4.1%	₹20,007	23%

Source: smb_leads.csv, 5,000 leads, Apr–Jun 2026 (synthetic). Cost per activation = acquisition cost ÷ activations; churn at 6 months.

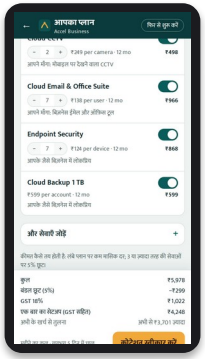

THE SOLUTION: NEEDS DISCOVERY WITHOUT A SALESPERSON (Q2)

From “what do I need?” to activated, in one sitting

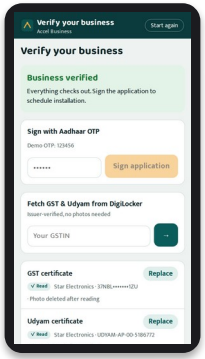

1 Talk

An AI advisor asks about 5 questions in the owner's language, by text or voice. A GSTIN fills in the details.

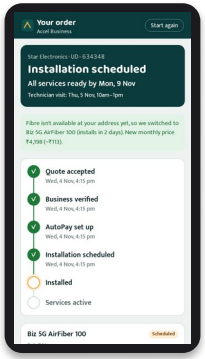

2 Choose

Three bundles with a reason for every item. One monthly price incl. GST; switch add-ons on or off.

3 Verify

Consent, then DigiLocker or a photo, checked against GST and Udyam records. Aadhaar e-sign.

4 Track

UPI AutoPay, technician slot, live ETAs and WhatsApp updates. No calls to chase status.

WHAT OWNERS PAY · REAL QUOTES FROM THE PROTOTYPE, 12-MONTH PLANS INCL. GST

Dukaan Digital
Kirana, 2 people, Patna
₹3,004/month
Fibre 100 · 2 SIMs · Cloud POS & UPI billing
No setup fee · live in 5 days

Clinic & Office Pro
Dental clinic, 12 staff, Kochi
₹6,701/month
Fibre 300 · SIMs · CCTV · email · security · backup
₹4,248 setup · live in 5 days

Chain Connect
Restaurant chain, 6 outlets, Pune
₹23,339/month
Fibre 300 ×6 · failover ×6 · POS ×6 · 3 SIMs
₹28,320 setup · live in 5 days

Factory Line
Textile unit, 80 staff, Surat
₹18,308/month
Leased line · 8 machine IoT · SIMs · security
₹40,120 setup · live in 21 days

Screens from the working prototype. Prices from its rules engine: 5% off for 3+ categories, setup waived for micro firms on 12+ months, 24 months is cheaper.

NEAR-INSTANT KYC, DPDP-COMPLIANT (Q3)

Documents checked in seconds, against the source of truth

1 Quality blur score, auto-straighten

2 Format GSTIN checksum repairs OCR errors

3 Completeness GST/Udyam, signatory ID, address proof

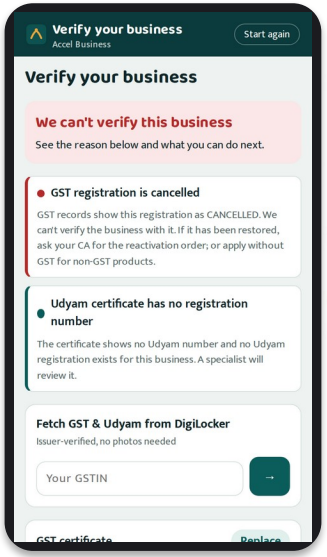

4 Registry GSTIN active? names & address match

5 Consistency same business on every document

6 Recency utility bill ≤ 90 days, ID valid

12 SAMPLE APPLICANTS, ALL CALLED CORRECTLY

K01 Blocked GSTIN cancelled	**K02** Approved tilted scan fixed	**K03** Approved clean
K04 Fix photo too blurry	**K05** Fix Udyam missing → confirm	**K06** Approved clean
K07 Review legal name altered	**K08** Approved clean	**K09** Approved clean
K10 Approved clean	**K11** Fix bill > 90 days old	**K12** Approved clean

Privacy by design purpose-wise consent, optional purposes unticked · documents never sent to the AI; Aadhaar, PAN and account numbers stripped from chat · photos encrypted and deleted once decided · IDs masked · audit log of every decision

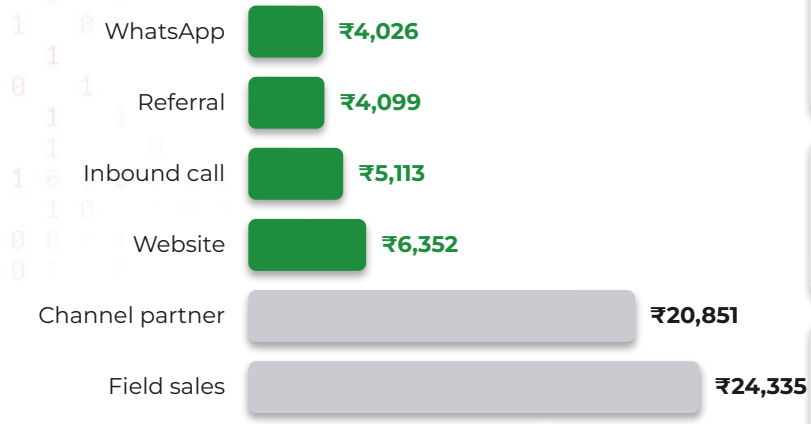

K01–K12: specimen documents and mock GSTIN/Udyam registries from the case pack; verdicts from the prototype vs our own answer key.

FIELD FORCE & PARTNERS (Q4)

People where they add value, paid for activations

COST PER ACTIVATION BY CHANNEL, Q2

Digital channels cost a fifth as much per customer. People should do the work digital can't.

Inside sales

Call the leads the advisor didn't close, best first. The lead score lifts conversion: the top 10% activate at 18.2% vs 7.4% overall.

Field sales

Multi-site chains and manufacturers: leased lines, site surveys, SD-WAN. The quote and KYC are done online before the visit.

Channel partners

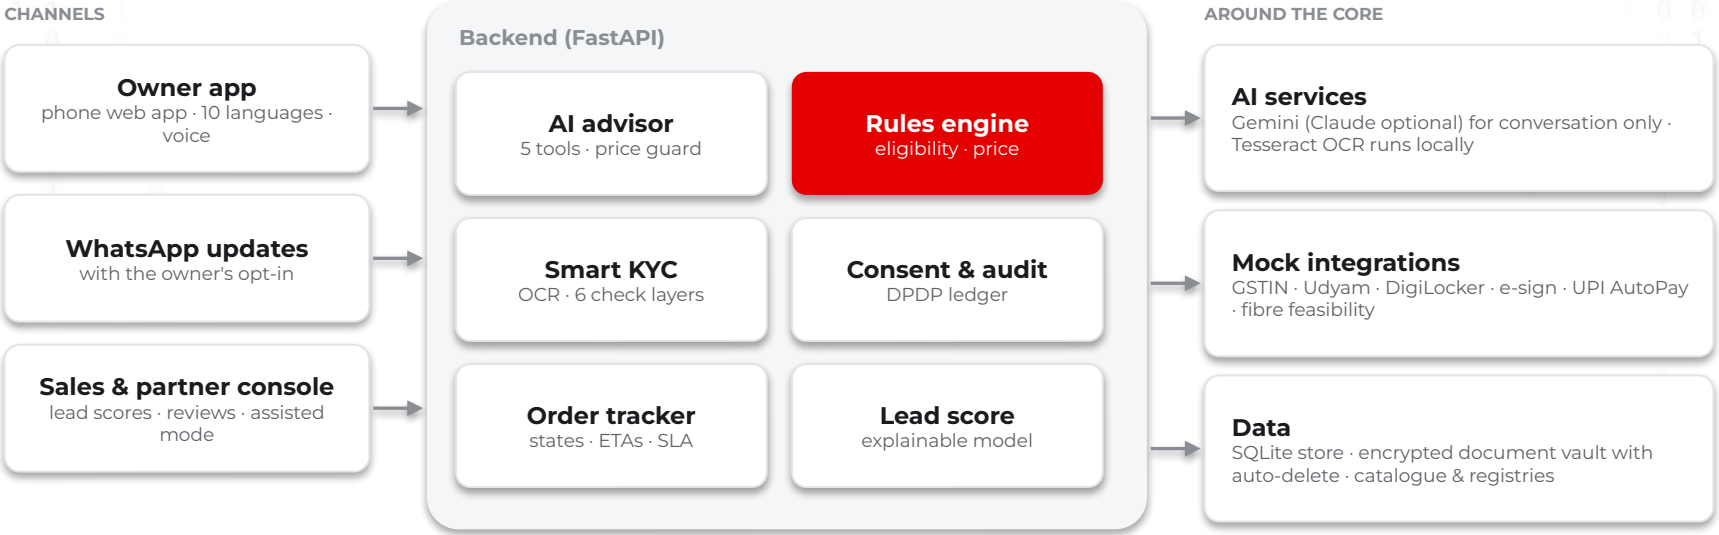

Tier-2 micro retail: installers and assisted sign-up on the owner's own journey (the owner shares a code). Paid on activation, not on leads.

Win-back: 3,026 Q2 leads lost before a needs assessment (unreachable, no time for a visit) get a WhatsApp link to the self-serve advisor.

Cost per activation = acquisition cost of all leads from a channel ÷ its activations (smb_leads.csv). Lead score tested on June leads it never saw (AUC 0.70).

HOW IT'S BUILT

A working prototype: the AI talks, the rules decide

128	30 / 30	12 / 12	49 / 49	5,000
automated tests	advisor test conversations	KYC applicants called correctly	rule-breaking Q2 sales rejected	lead profiles get valid bundles

Prices, eligibility and KYC verdicts are deterministic code; a guard rejects AI replies with unverified prices; a rule-based advisor covers AI outages.

HOW WE MEASURE SUCCESS (Q5)

Five numbers, measured from day one

METRIC	Q2 BASELINE	6-MONTH TARGET	WHAT MOVES IT
Lead → activation	7.4%	**15%**	Self-serve advisor, instant quote, online KYC
Lead → activation time	17.6 days	**≤ 7 days**	Same-day KYC, feasibility before payment, parallel installs
Cost per activation	₹15,053	**≤ ₹5,000**	Digital-first acquisition; partners paid on activation
Status-chase calls per customer	3.0	**≤ 0.5**	Live tracker and proactive WhatsApp updates
6-month churn	15.2%	**≤ 10%**	Right-fit bundles, no rule-breaking sales, fewer delays

Micro retail pays back in ~2 months, not 8
Today ₹20,007 to acquire a ₹2,470/month customer. Digital channels cost ₹4,000–6,400 per activation.

Zero rule-breaking sales
Q2 sold 49 ineligible items and activated 22 customers on cancelled or suspended GSTINs. The rules engine and KYC block both.

Baselines from smb_leads.csv (368 activations, Apr–Jun 2026). Targets assume pilot results in two cities; all five are tracked live in the console.

ROLLOUT & RISKS

An 8-week pilot, then scale city by city

Weeks 0–8 · Pilot
Pune + Kochi · professional offices and micro retail · web + WhatsApp · 2 partner networks

Months 3–6 · Scale
10 cities · voice in 6 languages · live GSTN, Udyam, DigiLocker, UPI AutoPay

Months 6–12 · National
All tier-1/2 cities · partner app · field-assisted multi-site and manufacturing

RISK	MITIGATION BUILT INTO THE PROTOTYPE
AI gives wrong advice	AI only talks; rules decide eligibility and price; output guard; tested scenarios; rule-based fallback
Forged or altered documents	Registry checks on every number, cross-document matching, specialist review, Aadhaar e-sign
Privacy (DPDP Act 2023)	Purpose-wise consent, minimal data, photos deleted after decision, masked IDs, audit log
Channel conflict	Partners paid on activation and can complete the owner's own journey with consent
Install delays, no fibre	Feasibility before payment, automatic switch to 5G AirFiber, SLA alerts and escalation

Ask: approve an 8-week, two-city pilot with one inside-sales pod and two partner networks; success = the five metrics on the previous slide.
